Education

MS. Applied Artificial Intelligence, *Lebanese American University*
01/2025 – present

Bachelor's Degree in Computer Engineering,
Lebanese American University
09/2019 – 12/2023 | Byblos, Lebanon

French Baccalaureate(Scientific Branch),
Lycee Libanais Francophone Prive Dubai
2004 – 2019 | Dubai, United Arab Emirates

Professional Experience

Data Analyst,
Choreograph, WPP's Data, Analytics & AI Solutions Company
08/2024 – present | Dubai, United Arab Emirates

- Built and maintained 20 production marketing and measurement dashboards using Looker Studio, Power BI, Tableau, BigQuery, and D3.js covering pacing, planned vs delivered, attribution, funnel, and creative analytics across MENA and global campaigns
- Delivered reporting frameworks tracking multi-million monthly media spend across platforms and markets, used by senior stakeholders for pacing and budget decisions
- Engineered Python and SQL data pipelines integrating multi platform media and attribution sources, processing millions of rows per dataset with automated refresh workflows
- Developed 30+ automation scripts and data workflows for ingestion, transformation, QA, and KPI computation, reducing recurring reporting effort from multi-day manual work to same-day turnaround
- Standardized KPI definitions and metric layers across dashboards, improving cross-platform consistency and reducing reconciliation effort across reporting cycles
- Built client specific AI assisted and multi source analytics solutions for measurement, pacing, and optimization across 10+ enterprise brands
- Implemented automated validation and anomaly checks that increased data reliability and enabled faster detection of delivery and pacing issues
- Prototyped advanced analytics systems including creative signal extraction pipelines and LLM based natural language to SQL analytics tools
- Collaborated with marketing, media, and strategy teams to support optimization decisions across dozens of concurrent campaigns
- Member of the internal AI Committee contributing to AI and automation adoption across analytics workflows

Key Accounts Supported: Americana (KFC, Hardee's, Pizza Hut...), Amazon, Huawei, Qatar Airways, Emirates Group Brands, Castrol, HONOR, AmEx KSA, and regional enterprise advertisers

Data Science Intern, *CMA CGM The HUB*
07/2023 – 09/2023 | Beirut, Lebanon

- Implemented a late shipment predictor that achieved an accuracy of 90%
- Worked on implementing a Generative Adversarial Network (GAN) on tabular data.
- Exposed to the applied usage of different types of data used in the shipping container industry

Computer Vision Engineering Intern, *Oculi*
06/2023 – 07/2023 | Jdeideh, Lebanon

- Created a Smart Fitness Tracker using Computer Vision and actionable signals
- Extracted actionable signals from videos and saved them as structured datasets for model training

Certificates

IBM AI Engineering, Google Analytics Individual Qualification, Google Analytics, Google Advanced Data Analytics

Projects

LLM Powered Voice Facilitator
Built a voice driven appointment scheduling agent using STT, TTS, and LLM orchestration with conversational analytics and a live dashboard for bookings, reschedules, and intent tracking.

Image Based Material Property Estimation
Developed a TensorFlow CNN to estimate material properties with 90%+ accuracy, created a custom labeled image and friction dataset, and published results in IEEE M2VIP.

Sign Language Translator
Implemented a real time ASL to text translation system using MediaPipe and Scikit learn with gesture feature extraction and live inference pipeline.

Optical Character Recognition
Trained and evaluated OCR models using TensorFlow and Scikit learn with 95% accuracy and deployed an interactive GUI for testing and model comparison.

Content Writing Assistant
Built an NLP based web app that analyzes readability metrics and rewrites text for target audiences using automated text scoring and rule driven adaptation.

Alert & Monitoring Systems
Designed automated KPI and uptime monitoring pipelines with rule based alerting and threshold logic to detect performance drops and service issues earlier.

Creative Analytics for Ads
Built media analytics pipelines extracting visual objects, text, and color features from image and video ads and linking them to performance metrics for creative insight generation.

Conversational Analytics
Engineered an LLM driven analytics system that converts natural language into SQL queries and returns structured insights and visual outputs from databases.

Synthetic Focus Group Application
Developed a persona based simulation platform where users generate synthetic audiences and run LLM driven dialogue sessions for opinion and messaging tests.

Technical Skills and Competences

Machine Learning & AI: Deep Learning (CNNs, RNNs, Transformers), Predictive Modeling, Computer Vision, NLP, Generative AI, LLM Applications

Frameworks and Libraries: TensorFlow, PyTorch, Scikit-learn, Keras, XGBoost, HuggingFace, NLTK, OpenCV, MediaPipe, Pandas, NumPy, Matplotlib, Seaborn

Cloud and Data Platforms: Google Cloud Platform (BigQuery, Looker Studio, Cloud Functions, Vertex AI exposure), SQL, NoSQL

Programming & Development: Python, Java, JavaScript, Linux, Git, API Integration

Analytics & Visualization: Power BI, Tableau, Looker Studio, D3.js, Interactive Dashboards, KPI Monitoring, Data Storytelling

Publications

Robot Quadruped Materials Dataset(RQMD) ✉, *IEEE Dataport*
Towards Image Based Material Estimation, *IEEE M2VIP*

Languages

Arabic, French, English
